ClimaSTORY®

“A tool to support adaptation to climate change, thanks to a digital interface for customized animation materials”

Rogelio Bonilla

Auvergne-Rhône-Alpes Energie-Environnement

digitalalps.eu

- strengthening the adaptive capacity of Alpine Territories through climate adaptation and risk mitigation management tools and practices
- assessing the Climate Adaptation Plans and **developing Climate Services** to support the territories and their local public authorities
- **making risk and adaptation planning more integrated, collaborative and inclusive**

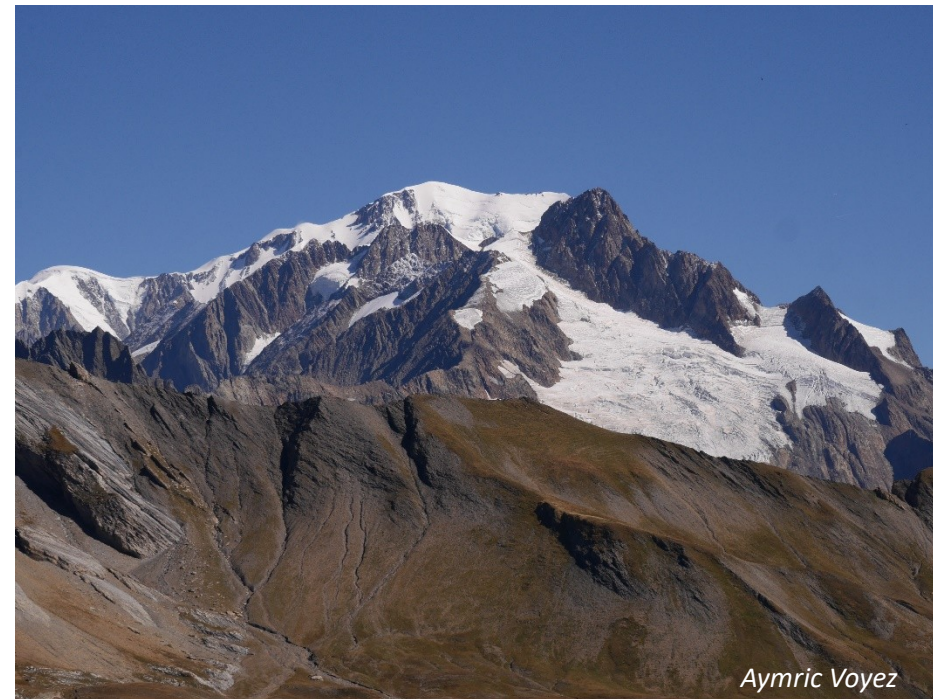

Interreg

Co-funded by
the European Union

Alpine Space

ADAPTNOW

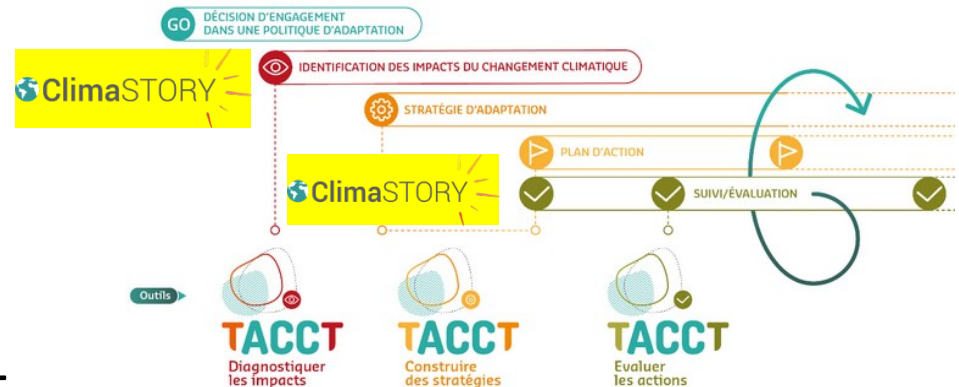

What is ClimaSTORY®?

- Facilitates **collective reflection and decision-making support**.
- Scope: climate change and adaptation solutions for **5 economic sectors**: Agriculture and forestry, Industry, Tourism, Trade and crafts, Health and safety, Planning, Management of resources and biodiversity.
- A **network of trained facilitators** throughout the region to work with local authorities

ClimaSTORY® is evolving

- Into a support tool in line with ADEME's **Territorial Climate Change Adaptation Trajectories (TACCT)**.
- Local authorities build their climate change adaptation policy from vulnerability assessment to monitoring measures and evaluating the actions.

ClimaSTORY[®] and digitalization?

Narrative

It will be a snapshot of the diagnosis:

- What are the main hazards to consider?
- Medium to high temperatures
- Impact of temperature extremes
- Precipitation

Map

- Data and decision making support
- Regional Observatories
- Tailored territories
